Galylio Blogs - Domain Authority Report

DR (Domain Rating) and UR (URL Rating) for all sites. Source: da-checker.org (Ahrefs-based). Checked 2026-11-05.

DR UR (scale 0-20)

Domain	DR	UR
points.tn	3	N/A
soukbladi.tn	N/A	4
generaldesign.tn	6	N/A
lequotidien.tn	6	5
snitnord.tn	5	5
webline.tn	N/A	4
chedmed.tn	7	4
openmosques.tn	0.2	4
pcs.tn	1	4
smartimpact.tn	N/A	4
yatout.tn	0.4	N/A
galylio.com	16	N/A

> **How to read:** N/A = the tool has no value yet (usually no measurable backlinks). Measured values are low (DR up to 16, mostly under 8), which is normal for new sites: DR/UR grow only with links from other websites.

Already done

- points.tn: www.points.tn now 301-redirects to points.tn (before, two hostnames shared the same links and split their strength).
- Satellites: pages that don't exist now return a real 404 (before: the homepage with a 200), and dead year folders were removed from the sitemaps.
- All sites: unique titles and meta descriptions, canonical tags, Open Graph tags, Article/BlogPosting and Organization schema, llms.txt.
- Satellites: every new article now links to the site's 3 latest articles (internal linking passes strength between pages and lifts UR).
- All 11 sites verified in Google Search Console and Bing Webmaster Tools, so indexing and incoming links can be monitored.

Next steps to raise DR / UR

- Earn real backlinks: DR and UR are built almost entirely from other sites linking to you. Start with Tunisian business directories, local press mentions, partner and client websites, and guest articles on relevant blogs.

- Publish a few link-worthy pages per site (original data, guides, comparisons) and share them, so people have a reason to link.
- Claim brand profiles (LinkedIn, Facebook, X, YouTube, Google Business Profile, Crunchbase) and link them to the sites; the Organization schema already lists related sites.
- Submit each sitemap in Google Search Console and Bing Webmaster Tools, and fix pages marked 'not indexed' in the Pages report.
- Use the Links report in Search Console to see who already links to each site, and reclaim links that point to old or broken URLs.
- Be careful with cross-linking the whole network: mass links between all 11 sites, or paid link networks, can be treated as link spam by Google and hurt rankings. Keep links editorial and relevant.
- Re-run the DR/UR check monthly. Expect slow movement: DR rises only as new referring domains are discovered.
